

HMO India VIX — DAX Measures

Important measures used in the Power BI Proof of Concept

Current VIX

```
VAR LatestDate = MAX(IndiaVIX_Cleaned[Date])  
RETURN CALCULATE(MAX(IndiaVIX_Cleaned[Close]), IndiaVIX_Cleaned[Date] = LatestDate)
```

Purpose: Returns the closing VIX on the latest date in the current filter context.

Average VIX

```
AVERAGE(IndiaVIX_Cleaned[Close])
```

Purpose: Average closing VIX.

Maximum VIX

```
MAX(IndiaVIX_Cleaned[Close])
```

Purpose: Highest closing VIX.

Minimum VIX

```
MIN(IndiaVIX_Cleaned[Close])
```

Purpose: Lowest closing VIX.

Trading Days

```
DISTINCTCOUNT(IndiaVIX_Cleaned[Date])
```

Purpose: Number of unique trading dates.

Average Daily Change

```
AVERAGE(IndiaVIX_Cleaned[Daily Change])
```

Purpose: Average absolute daily VIX movement.

Average Daily Return

```
AVERAGE(IndiaVIX_Cleaned[Daily Return %])
```

Purpose: Average daily percentage movement.

Maximum Daily Increase

```
MAX(IndiaVIX_Cleaned[Daily Return %])
```

Purpose: Largest positive one-day percentage movement.

Maximum Daily Decrease

```
MIN(IndiaVIX_Cleaned[Daily Return %])
```

Purpose: Most negative one-day percentage movement.

Average Intraday Range

```
AVERAGE(IndiaVIX_Cleaned[High-Low Range])
```

Purpose: Average High-Low range.

Volatility Spike Days

```
COUNTROWS(FILTER(IndiaVIX_Cleaned, ABS(IndiaVIX_Cleaned[Daily Return %]) >= 10))
```

Purpose: Counts days with absolute daily return of at least 10%; project-defined threshold.

Positive Movement Days

```
COUNTROWS(FILTER(IndiaVIX_Cleaned, IndiaVIX_Cleaned[Daily Change] > 0))
```

Purpose: Counts days when VIX increased.

Negative Movement Days

```
COUNTROWS(FILTER(IndiaVIX_Cleaned, IndiaVIX_Cleaned[Daily Change] < 0))
```

Purpose: Counts days when VIX decreased.

Highest VIX Date

```
VAR HighestValue = MAX(IndiaVIX_Cleaned[Close])  
RETURN CALCULATE(MAX(IndiaVIX_Cleaned[Date]), IndiaVIX_Cleaned[Close] = HighestValue)
```

Purpose: Date corresponding to the highest closing VIX.

Lowest VIX Date

```
VAR LowestValue = MIN(IndiaVIX_Cleaned[Close])  
RETURN CALCULATE(MAX(IndiaVIX_Cleaned[Date]), IndiaVIX_Cleaned[Close] = LowestValue)
```

Purpose: Date corresponding to the lowest closing VIX.

Largest Daily Increase Date

```
VAR HighestReturn = MAX(IndiaVIX_Cleaned[Daily Return %])  
RETURN CALCULATE(MAX(IndiaVIX_Cleaned[Date]), IndiaVIX_Cleaned[Daily Return %] = HighestReturn)
```

Purpose: Date corresponding to the largest positive daily return.
